# Santhosh Shanmugam

Full stack Web Developer  
Chennai, Tamil Nadu, India

## Summary

Aspiring Full-Stack Developer | UI/UX Enthusiast

Hello, I'm Santhosh Shanmugam, and I'm on a mission to create exceptional web experiences from start to finish.

### # My Toolbox:

- Frontend: JavaScript, React , Angular
- Backend: Node.js ,Java
- Design: Adobe XD ,Figma
- Styling: Tailwind CSS, Bootstrap
- Databases: SQL, MongoDB
- Testing: Selenium (automation testing) (Basics)
- Firebase ,Gemini API , Vercel , Netlify
- Glthub , Postman
- Bonus: PHP for that extra versatility!

### What Sets Me Apart:

I may be a fresher, but my passion for web development runs deep. My journey began with a fascination for crafting beautiful, user-friendly interfaces. Along the way, I've honed my skills in both frontend and backend technologies, making me a versatile candidate for full-stack projects.

### My Strengths:

- UI/UX Excellence: I understand the importance of user-centered design and can create interfaces that not only look great but also provide a seamless user experience.
- Tech Stack: Proficient in Javascript, React, Angular, Node.js, and more, I'm ready to tackle complex projects and bring ideas to life.
- Problem Solver: I thrive on challenges and love finding creative solutions to coding puzzles in Leetcode and HackerRank Platforms.

- Team Player: Collaboration is key, and I'm excited to work with diverse teams to achieve common goals.

#### Always Learning:

While I've already gained experience with various technologies, I'm committed to continuous learning. I'm currently exploring [mention any ongoing learning initiatives, like online courses or personal projects] to expand my skill set.

#### Let's Connect:

I'm eager to connect with fellow developers, mentors, and anyone passionate about technology. If you're looking for a motivated full-stack developer with a flair for design or if you'd like to share insights and ideas, please don't hesitate to reach out. Together, we can build remarkable web solutions!
